

Information for Arconic Customers of Arconic European legal entities

Dear Valued Arconic Customer:

We are committed to product safety and to support our customers by ensuring supply chain continuity and providing the information our customers need to comply with their REACH⁽¹⁾ obligations. This is why we have established a dedicated REACH Management Team that anticipates and manages potential REACH related impacts to our product portfolio, and a REACH data management system that has allowed us to achieve the following:

Registration:

We are ensuring compliance of our operations based in Europe with the REACH registration requirement. Arconic legal entities have registered the substances of their product portfolio legally required to be registered by those legal entities.

Please note that many of our products (e.g., fasteners, turbine vanes, building panels, coils, plate, sheet and foil, rod) are considered as articles under REACH. Substances in articles are not subject to the registration requirement.

Safety Data Sheets (SDSs)

Please note that most of Arconic products do not require an SDS as per Article 31 of REACH; Arconic is providing these SDSs voluntarily.

Candidate list & REACH Article 33 communication requirement

Arconic is monitoring the substances on the candidate list, which is being modified twice a year, and their presence in our products. We communicate to our customers presence of a substance of the candidate list > 0.1 % of weight in our products.

Authorization and Restriction:

We are ensuring compliance of our manufacturing operations based in the European Economic Area with the REACH authorization requirement. We have identified substances of the authorization list or recommended to join the list used in our production processes in EU internally or by our subcontractors. We are actively working to ensure supply chain continuity either through authorization or substitution.

We carefully monitor Annex XVII additions to ensure compliance with the restriction requirement.

If you have any question regarding Arconic products and REACH, you can address your Arconic Commercial contact or the Arconic REACH Team at: ReachTeam2@arconic.com.

Innovation, engineered.

(1) European Regulation N° 1907/2006 of the European Parliament and of the Council of 18th December 2006 concerning Registration, Evaluation, Authorization and Restriction of Chemicals, also known as REACH Regulation
