## PROJECT REPORT

# Residential house

West Bridgford, Nottingham, UK

## ARCHITECT

Jonathan Metcalfe  
AM2 Architects

## MANUFACTURER

Metal Solutions Ltd.

## PRODUCT

75 m<sup>2</sup> Reynolux® pre-painted aluminium sheets  
in 0.67 mm thickness

## SURFACE

Colour: Customized Gold Satin  
Coating: DURAGLOSS® 5000

## APPLICATION

Standing seam 25 mm angled

## ABOUT

In this house extension project, the leading wish of the clients was extremely accurate: bring more space, more light, more opening to the outside and especially more modernity to the original red bricks traditional house.

The architects designed a double-height rear extension with a large decking space to create an open plan living space comprising of kitchen, dining and living room. The new extension also provides a large new master bedroom with a private balcony overlooking the backyard garden.

The resolutely contemporary design of the facade plays with gold metal cladding and light brick veneer, punctuated by large glass openings, to create a truly modern aesthetic. The graphic lines are accentuated by the vertical relief pattern achieved with the 75 m<sup>2</sup> of Reynolux® pre-painted aluminium sheets, roll-formed in 25 mm angled standing seam thanks to the high flexibility and durability of the Duragloss® 5000 paint quality.

The glazing is present everywhere, on the walls but also on the roof, to frame the views and allows plenty of natural light into the interior spaces. Revamped to dress the house with lush greenery, the landscaping offers a large social space accessible through the large bi-folding doors to the rear of the property.
