

## Come and see us at Busworld and Solutrans!

### Alcoa Wheels is expecting you at Busworld

We are pleased to be exhibiting at Busworld Europe taking place in Kortrijk, Belgium on 20 – 25 October.

With its over 40 years of experience, it is the oldest and most famous bus and coach exhibition and conference with all major bus and coach manufacturers, components-, parts and accessories producers, service providers.

This is the event that highlights the latest developments in the bus sector, so come and visit us in hall 9 stand 951b where we will be introducing our new innovation, the Dura-Bright®/Dura-Flange® surface treatment.

With the combination of our two proven and tested technology the result is a wheel that offers more protection against rim flange wear, extending the service life of the wheel while maintaining its premium, high-shine, easy to clean appearance.

### New innovations are waiting for you

Solutrans is the urban and road transport solutions show which is taking place from 21 to 25 November at Lyon Eurexpo in France.

It's the biennial trade fair where innovation and information come together in the HGV sector and we are excited to be part of this.

Alcoa Wheels - as always - represents themselves with a cutting-edge stand and will put something new on the table. If you would like to be amazed again this year, visit us on stand 3 J 101.

Besides the opportunity to see and feel our new innovation, the Dura-Bright®/Dura-Flange® surface treatment we present other catchy and crispy new products of us.

We do hope to see you there and have a chance to share our latest innovations with you!

# Alcoa Wheels on the road

## Get greener and leaner like PostBus in Switzerland

Ever heard of a city bus company lowering its total cost of ownership while being more sustainable at the same time? Well, PostBus Ltd sure managed to do so. The company saved on weight, optimized its passenger capacity, lowered fuel and tire costs, reduced CO<sub>2</sub> emissions and kept their awesome looks.

What was the trick behind it? Alcoa Wheels

of course. PostBus fitted Alcoa Wheels on a standard and articulated bus and took the vehicles to the test. After a 12 month trial they measured significantly less fuel consumption on the standard bus and an impressive reduction of tyre wear on the 3 axles of the articulated bus. The difference on the front axle was – not kidding – amazing.

With such convincing results PostBus

immediately decided to hop on the bus. 40 of their articulated buses will be retrofitted to Alcoa Wheels still this year. A great win in the long run as the company will in the end reduce its CO<sub>2</sub> emissions by 4T for every articulated bus on Alcoa Wheels over the service lifetime of 12 years.

PostBus Ltd is Switzerland's number 1 public transport operator on the road. With 1200 standard and 300 articulated buses the company carries around 152 million passengers each year. The PostBus brand embodies the values of reliability, security and trust. Alcoa Wheels and PostBus go way back as the company already had a small portion of its buses fitted with the brand. With this strengthened partnership 57 buses will be on the road with Arconic's forged aluminium Alcoa Wheels. We couldn't be happier.

For more information about PostBus, please visit <https://www.postbus.ch>.

## New Scania Iberia Launch

### Alcoa Wheels complete the look of the new range

Scania had a successful launch event where they presented the new Scania XT range for construction, of course on Dura-Bright® Alcoa Wheels. Our Fleet Manager from Spain, Ms. Almudena Sanchez, was present on 3 days during their 4 days event.

Features of the new range were presented in details as well as the advantages that Alcoa Wheels bring.

The highlight of the event was definitely when Marc Márquez and Álex Márquez had a chance to present and drive the Scania G450 8X4 on Dura-Bright® Alcoa Wheels.

They were amazed by the toughness and maneuverability of the new range Scania XT.
