DURA-BRIGHT® WHEEL WASH TESTS!

DESCRIPTION

- Dura-Bright® surface treatment is designed to be easy to clean and to stay bright and shiny when properly maintained. Therefore Alcoa developed the Dura-Bright® Wheel Wash to provide a safe product to use on both XBR® and EVO Dura-Bright® wheels. As it has been developed and approved by Alcoa Wheels, it gives customers the assurance that they are cleaning their wheels with a safe cleaning solution and a product with additional benefits.
- It is especially developed and tested by Alcoa for weekly use on Dura-Bright® wheels and it helps to prevent the buildup of brake dust resin and copper glow.

MORE ADVANTAGES

- No need to dilute
- Only 100 ml needed per wheel
- Helps to prevent brake dust resin and copper glow
- No risk of damaging wheels with harsh chemicals
- Neutral non-chemical fragrance
- Soft red color to distinguish from ALclean
- Not classified as dangerous goods according CLP and Reach directives
- Safety data sheet is available

PACKAGING

- Starter kit including a 1L bottle of Dura-Bright® Wheel Wash, one ALbrush2 and handy cleaning instructions
- 5L bottles
- 25L bottles

CLEANING INSTRUCTIONS

Allow wheels to cool down to 35° C (95°F). Remove cap nut covers.

Rinse with water for at least 30 seconds.

Pour Dura-Bright® Wheel Wash in a bucket. No need to dilute with water.

Clean the wheel.

Rinse the wheel.

Repeat at least weekly.

STILL NOT CONVINCED? SEE BELOW RESULTS

- before

- after

- before

- after

- **cleaning tip:** use an old toothbrush to clean the vent holes, stubborn spots and copper glow

before cleaning

after cleaning: the copper glow vanished

after cleaning

Convinced of the stunning results? Now it's up to you to find it out.
