Arconic Micromill™ Wins 2017 Bronze Edison Award

NEW YORK, NY, April 21, 2017 – Arconic (NYSE: ARNC) announced today that the Arconic Micromill™ won a 2017 Bronze Edison Award in the applied technology segment. Named after Thomas Edison, one of history's most renowned inventors, the Edison Awards™ celebrated its 30th year of recognizing the best innovations and innovators at the April 20 event.

Arconic Micromill, which produces metal that is 40 percent more formable and 30 percent stronger than today's automotive aluminum, has more than 130 patents on file worldwide and has qualification agreements in place with 13 major automakers on three continents, including Ford Motor Company.

"Our judges recognized that Arconic Micromill exemplifies the spirit of the Edison Awards -- innovation that meets a market need," said Frank Bonafilia, executive director of the Edison Awards.

The Micromill technology is well timed to meet the growing demand of our global automotive customers. Ford was the first automaker to use Micromill aluminum, with the material debuting on multiple components on the 2016 Ford F-150. Additionally, Arconic has partnered with Ford in a joint development agreement to collaborate on next-generation aluminum alloys for automotive parts using Micromill technology.

The ballot of nominees for the Edison Awards was judged by a panel of leading business executives, including past award winners, academics and leaders in the fields of product development, design, engineering, science and medicine.

The Bronze Edison Award joins the list of recognition for the Micromill, including the 2016 R&D 100 Award, the Altair Enlighten Award (runner-up) and the Platts Global Metals Finalist Award.

About the Edison Awards

The Edison Awards is a program conducted by Edison Universe, a non-profit 501(c)(3) organization dedicated to fostering future innovators. The Awards have been recognizing and

honoring the best in innovations and innovators since 1987. They honor game-changing innovations that are at the forefront of new product and service development, marketing and human-centered design, and are one of the highest accolades a company can receive in the name of successful innovation. For more information about the Edison Awards complete program and a list of past winners, visit www.edisonawards.com.
